

EDITORIAL

The present special issue of the International Journal of ChemTech Research contains selected papers presented at the 3rd National Conference on “Challenges in Biochemical Engineering and Biotechnology for Sustainable Environment, CBSE - 2014” which was organized by Department of Chemical Engineering, Annamalai University, Tamil Nadu, India between 2 and 3 April, 2014. A national board of valued scientists comprised its scientific committee.

The conference is designed to encourage the exchange of ideas and knowledge between diverse groups of the scientific community (scientists, practicing engineers and academia) concerned by current issues in bioprocess technology, biotechnology applications in health and medicine, antimicrobials, environmental biotechnology, food processing engineering, food microbiology and bioenergy.

I register gratitude to our university and the higher administration for their unreserved help, guidance and encouragement. I would like to thank all the authors for their worthy contributions to this special issue of International Journal of ChemTech Research. Furthermore, I would like to express my gratitude to the Journal Editor for the faith he showed in us, his valuable remarks and his undeterred help throughout the handling of manuscripts.
