**Abstract :** The aim of this study focused on the pharmacological profile of the plant *Eclipta prostrata*. these activities are wound recuperating, antihyperglycaemic, Alopecia, Hepatoprotective, gum disease, Immunomodulator, cancer prevention agent, hostile to diabetic, antidote venom, Osteoprotective, antidermatophytic, antibacterial, hostile to HIV, anticancer, cytotoxic and so forth. *Eclipta Prostrata* is little expanded yearly herbaceous plant with an antiquated time conventional drugs utilizes in numerous nations particularly in tropical and subtropical districts. An assortment of synthetic aggravate that are available in various parts of plant including coumestans, alkaloids, thiopenes, flavonoids, polyacetylenes, triterpenes and their glycosides have been confined from this species. This commitment gives a complete survey on pharmacological profile as therapeutic plant.

**Keyword :** Review *Eclipta prostrata*, Pharmacological activity *E. prostrata*, *Eclipta prostrata*.
